XOGENIUS contains > 12 grams of beta-BHB hydroxybutyrate salts (BHB) the world's most powerful science-backed ingredient, with the energy to mitigate the typical side effects of taking Ozempic[®] or Wegovy[®].

Two daily packets of XOGENIUS delivers 225% more energy than inflammatory sugar or carbs, and can reduce fatigue, digestive issues, and muscle loss that can occur in many cases using Ozempic[®] or Wegovy[®] — all while supporting normal glucose levels.

BHB is a high-powered ketone naturally created by the liver during ketosis (fat-burning state). Ketones are the body's preferred fuel, and function in harmony with our highest levels of metabolism. XOGENIUS is bio-identical to the BHB the body naturally produces.

Because of its unique molecular nature, XOGENIUS passes effortlessly into the brain — creating a cellular power source that boosts energy, sharpens focus, and helps you feel your best.

In this way, XOGENIUS not only mitigates Ozempic's[®] and Wegovy's[®] side effects, but enhances patients' fat loss with natural balance, digestive comfort, and increased energy.

Keto5

SUPPORT & MAINTAIN YOUR WEIGHT LOSS

The temporary use of Ozempic[®] or Wegovy[®] for weight loss, while successful, ultimately results in regained weight for most people after use is discontinued.

XOGENIUS can work to perfectly complement and support your Ozempic[®] experience by enhancing the benefits, minimizing side effects and maintaining your weight loss.

🕒 SUPPORT

XOGENIUS enhances your Ozempic[®] or Wegovy[®] journey with natural appetite suppression, increased energy, and all four essential electrolytes for superior hydration and balance.

🕒 MAINTAIN

XOGENIUS includes XOSTART a combination providing improved gastrointestinal distress, bloating, or insulin spikes commonly associated with other products. This results in stable ketosis, while keeping off the weight you just lost.

Keto5 is a premium exogenous ketone brand, physician designed and available through a network of healthcare and wellness professionals.

Exogenous ketones have undergone years of rigorous clinical trials for quality and safety, and are USDA certified organic, non-GMO, and 100% vegan, kosher, and gluten-free.
